PROJECTS

Moody - Movies by Destination [github.com/dahliakadri/movies_by_destination]

Full stack Python, JavaScript and React web application. Utilizes IMDB's datasets and Google Maps API. Users can search, save, and share the top rated movies by country. Deployed on AWS [moodymovies.sadrail.com]

Travel Quiz [github.com/dahliakadri/Travel_Quiz]

First backend Python project. Generated tailored destinations based on questionnaire data about a users workday.

PROFESSIONAL EXPERIENCE

Box, Inc.

March 2017 - Present

Technical Program Manager

Redwood City, CA

- Support a web application firewall implementation with Agile program management of the infrastructure security and edge engineering teams.
- Developing a Box internal tool to detect insecure publicly shared content by developing a Python script to parse the content and a UI in JavaScript for employees to search their content.

Executive Assistant

- Direct support to Chief Information Security Officer, Chief Information Officer, and SVP Global Partners.
- Lead annual Partner Summit with top 300 Box partners through cross organizational and partner logistics.

Microsoft, Inc.

Sep 2015 – Oct 2016

Corporate Responsibility Associate

Cairo, Egypt

- Developed youth computer science programs with universities, government, and UNDP.
- Organized event logistics, external communications, and CSR impact reports which generated opportunities for youth and employee engagement.
